Prerequisites	03
Install the application	03
Registration and Login	04
Application page guide	05-07

Prerequisites

- The X-PHY® SSD must be configured with XPHY User Application Tool.
- Refer to <https://x-phy.com/quick-start>.
- Enable your Location and Bluetooth connection.
- Minimum requirement for the mobile device is IOS 11 and above.
- Make sure the X-PHY® SSD is powered ON within 10 meters.

The downloading of app should be from Apple store. The installation should be done on a trusted mobile and in a physically secure environment.

Step 1: Install the application

- a Install the “XPHY Connect” App from the Apple store.
- b Or, download from the link below:

<https://apps.apple.com/app/id1567514699>

Step 2: Registration and Login

a Once the installation is complete, click on “Open”; the “Create Account” page will be visible.

b Fill up the form with the required information such as:

User Name

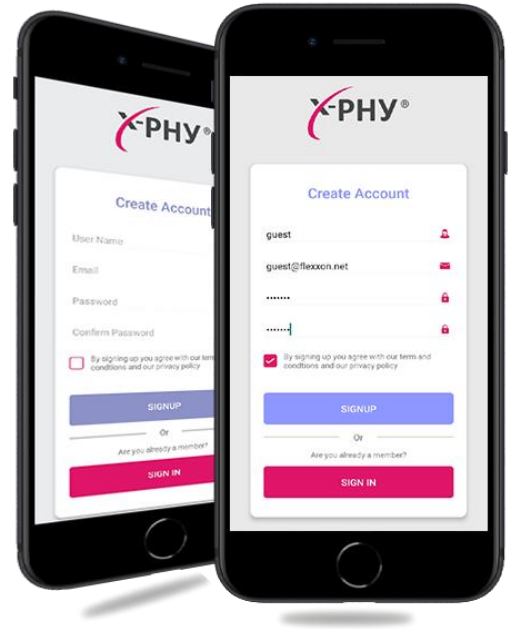

Email

Password

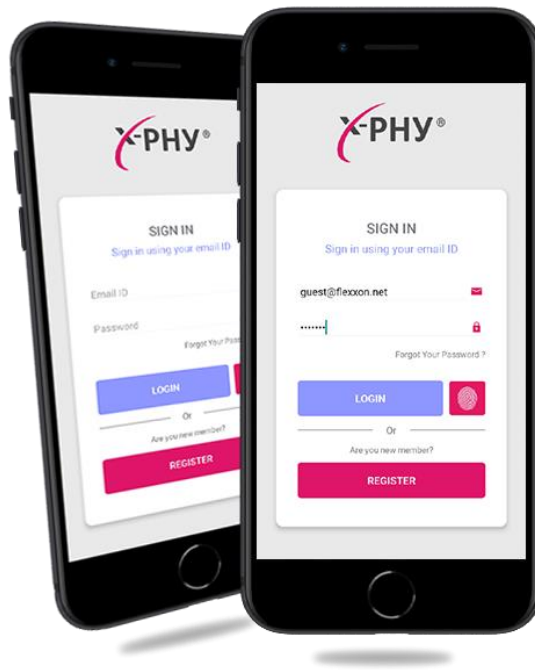

Confirm Password

then click on the ‘Privacy Policy’ check box,

and the “SIGNUP” button.

c After the successful registration, the “SIGN IN” page will appear. Enter the credentials used during registration and click on the “LOGIN” button.

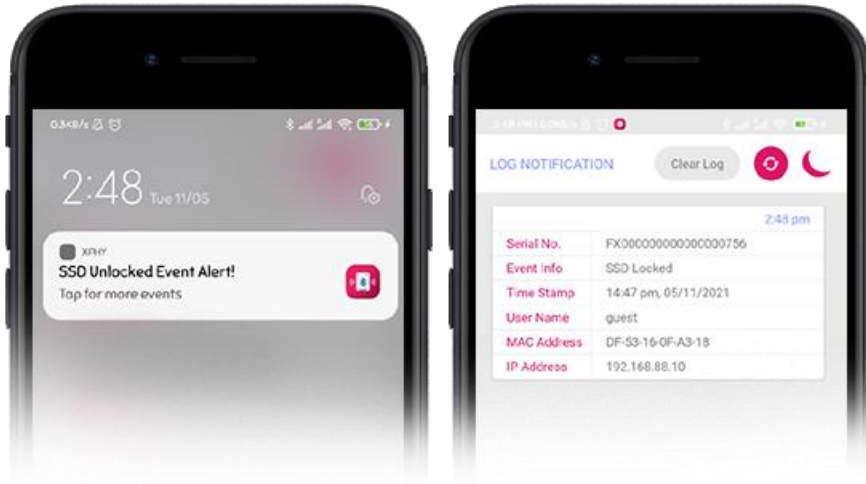

Step 3: Application page guide

- a Once the login is completed, the “LOG NOTIFICATION” page will be visible. There will be three buttons at the bottom of the app; clicking the Bluetooth icon will open the Bluetooth scanning page.
- b The Bluetooth scanning page will also display a list of available X-PHY® devices by the name of “Flexxon_XPHY” along with the device address.

- c To pair up the device click the “Pair” button. After the device is paired, the same button will be displayed as “Paired”.
- d As long as the device is paired, all the live notifications will be displayed on the “LOG NOTIFICATION” page. The user can also know about the last 3 events by pressing the Refresh button in the top panel of the “LOG NOTIFICATION” page.

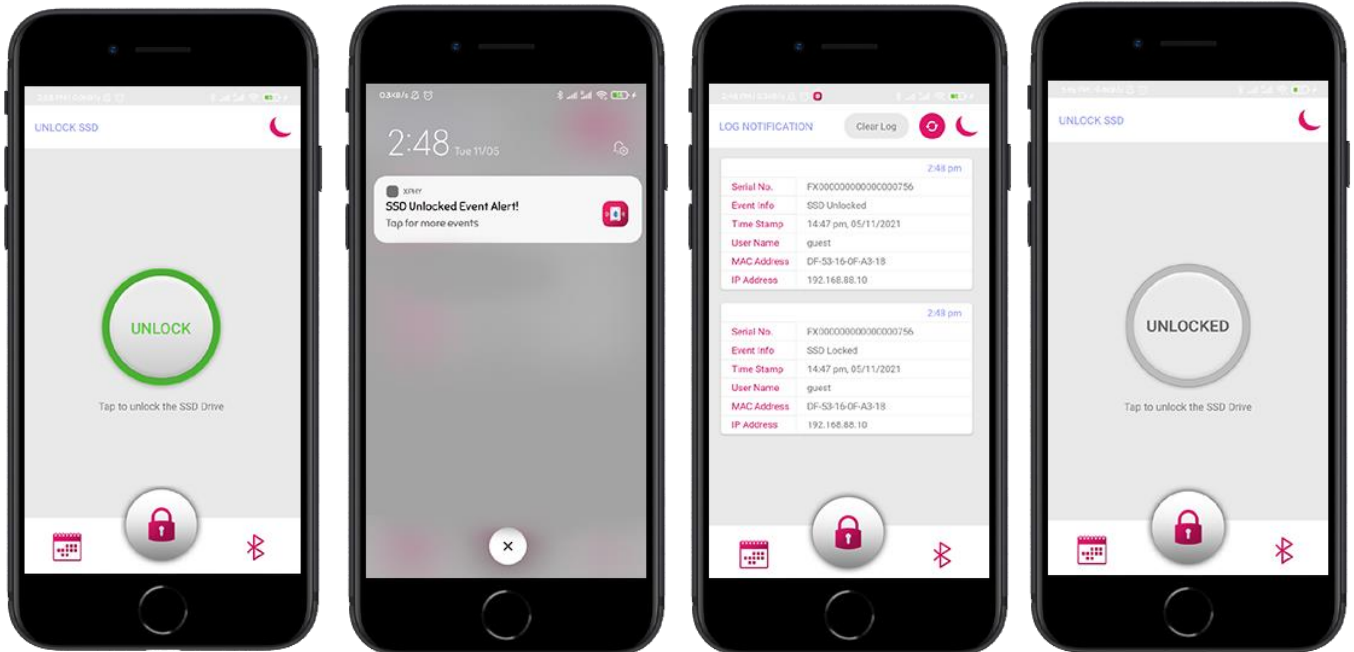

e If the SSD is Locked, the events will appear as “SSD Locked Event Alert!”

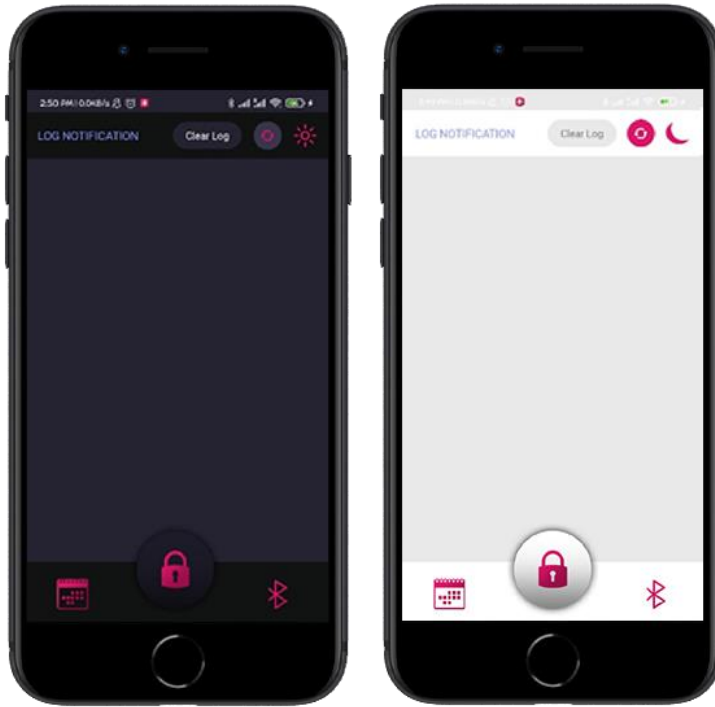

f Users can use the “UNLOCK” page to unlock the SSD. Click the “UNLOCK” button, an OTP will be sent to the registered Email ID. Type the password to unlock the SSD and receive the Event Notification as “SSD Unlocked Event Alert!” through Android Push Notification

Please ensure that this is performed on a trusted admin PC and in a physically secure environment. The event that trigger must be reviewed and ensure that it has been rectified.

- g** Additionally, use the “Clear Log” button to clear the Logs listed in the event log page. This will only clear the log in the app. The actual log is still within the SSD.
- h** Click the “moon” button at the top panel to toggle between the dark theme and light theme.
